Simple Details Single Stage Paint Correction **\$1,000.00**

The Single Stage Paint Correction is equivalent to a one step polish. While the service can provide different results for many different vehicle finishes (Example: Softer paint= 50%-80% defect removal, Harder Paint= 40%-60% defect removal) the one thing that is common across the board is it will. always enhance your vehicles paint clarity and gloss levels. Again, this is not the perfect paint correction service for defect removal, but it will enhance your paints appearance. Package include: • Full Cleaning of the Cars Exterior and Interior using our safe cleaning methods to avoid additional paint defects with full decontamination. • Single Stage Correction Polish using the right tools and polish combination for your individual vehicles finish. • Application of the highest-grade Sealant to help protect your vehicles new enhanced finish. For a more durable protection with higher gloss levels we recommend adding one of our Ceramic Coating Packages.

SUV/Large
